Demand Plan App — End-to-End Test Results

Test Date: 2026-03-19 **Accounts Tested:** Walmart (`0016100001TPKunAAH`), Vizio (Inscape dba Vizio LLC)
Environment: http://localhost:5173 (Vite dev server) + http://localhost:8000 (FastAPI backend)

Test Summary

Round 1 — Core Feature Tests

#	Area	Test	Result
1	Setup	App loads on Setup tab by default	✅ Pass
2	Setup	Databricks connection status shown	✅ Pass
3	Setup	Google OAuth authorization shown	✅ Pass
4	Setup	Account search returns results	✅ Pass
5	Setup	Search results close button works	✅ Pass
6	Setup	Walmart account added successfully	✅ Pass
7	Setup	Vizio account search and add	✅ Pass
8	Setup	Walmart data loaded (Load button)	✅ Pass
9	Setup	Vizio data loaded (Load button)	✅ Pass
10	Demand Plan Summary	Summary tab shows both accounts	✅ Pass
11	Demand Plan Summary	Scenario toggles work	✅ Pass
12	Historical Consumption	Historical overview renders	✅ Pass
13	Historical Consumption	Charts display correctly	✅ Pass
14	Scenario Builder	Scenario builder loads	✅ Pass
15	Scenario Builder	Add use case flow works	✅ Pass
16	Consumption Forecast	Forecast tab renders	✅ Pass
17	Account Overview	Account overview tab renders	✅ Pass
18	Export	Export menu opens with 3 options	✅ Pass
19	Export	Formatted Excel export (download)	✅ Pass
20	Export	Upload to Google Drive	✅ Pass

Round 1: 20/20 tests passed.

Round 2 — Use Case Addition Tests (2 Use Cases per Account)

#	Area	Test	Result

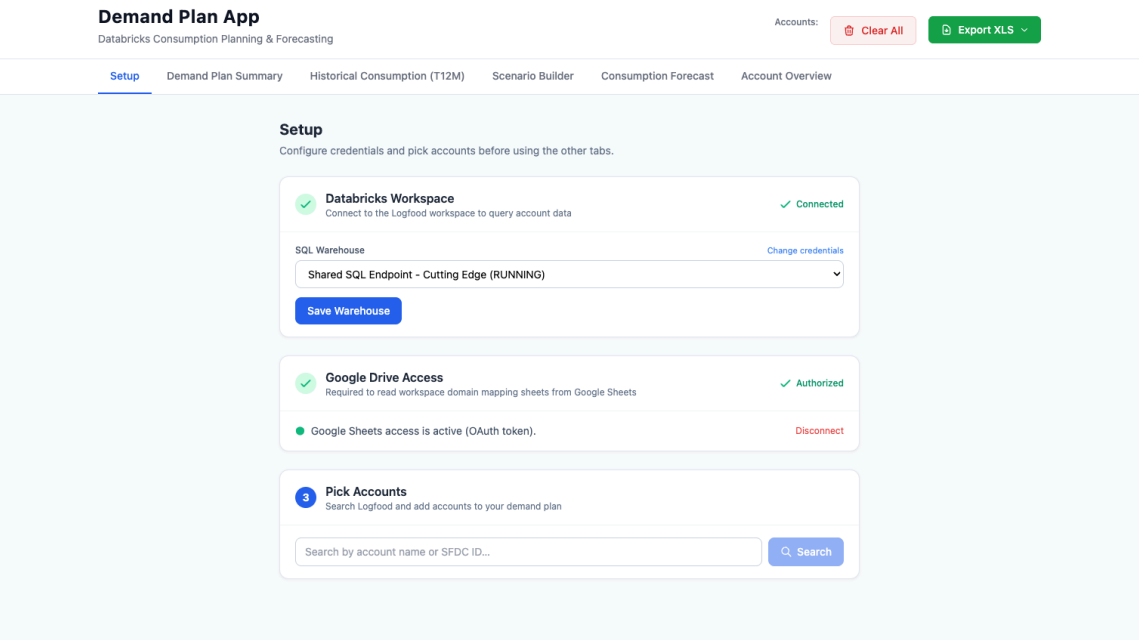
21	Setup	Both accounts present and loaded	✅ Pass
22	Scenario Builder	Scenario Builder initial state	✅ Pass
23	Scenario Builder	Walmart — Use Case 1 (Cloud Migration) added	✅ Pass
24	Scenario Builder	Walmart — Use Case 2 (Data Integration Pipeline) added	✅ Pass
25	Scenario Builder	Vizio — Use Case 1 (Cloud Migration) added	✅ Pass
26	Scenario Builder	Vizio — Use Case 2 (Datalake Optimization) added	✅ Pass
27	Scenario Builder	All 4 use cases visible in builder	✅ Pass
28	Demand Plan Summary	Summary reflects new use case projections	✅ Pass
29	Consumption Forecast	Forecast updated with use case data	✅ Pass
30	Export	Export menu accessible	✅ Pass
31	Export	Formatted Export with use cases	✅ Pass
32	Export	Drive upload with use cases	✅ Pass
33	Export	Drive URL shown in success toast	✅ Pass
34	General	App stable after all operations	✅ Pass

Round 2: 14/14 tests passed. Total: 34/34 tests passed.

Screenshots

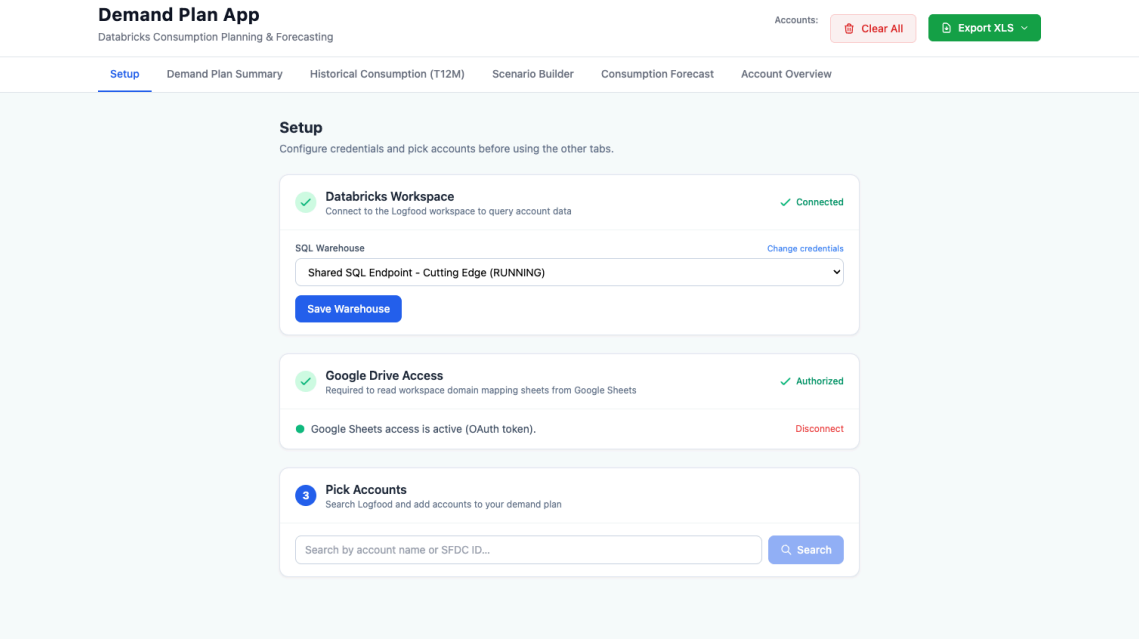
1. Setup Tab — Initial Load

App opens on the Setup tab by default (not Summary).



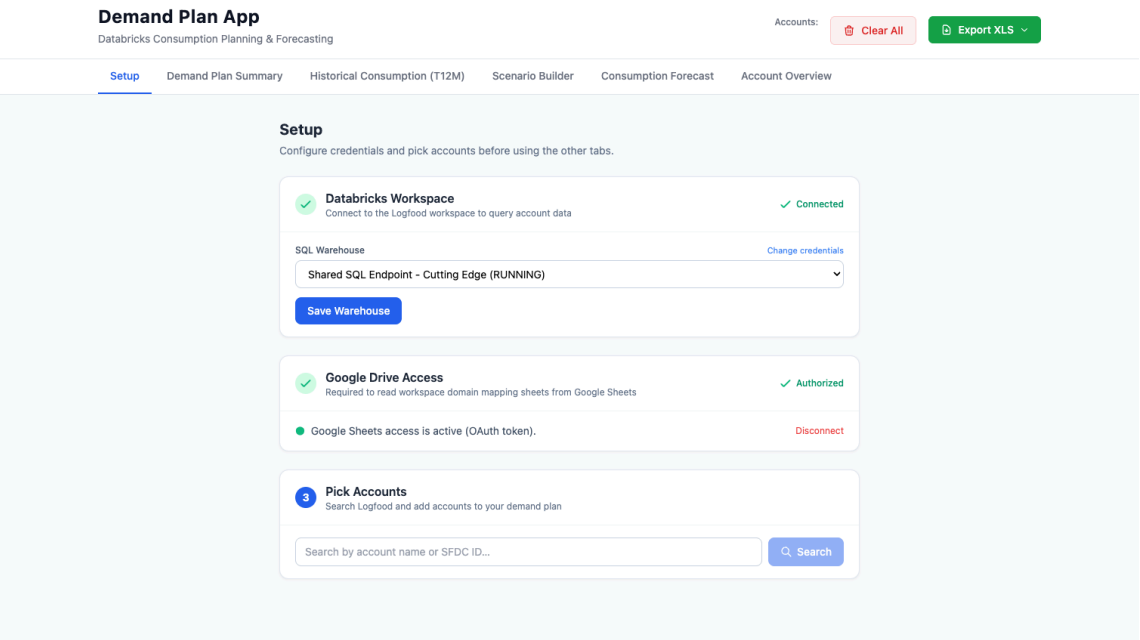
2. Setup — Databricks Connected

Databricks connection status indicator is shown as connected.



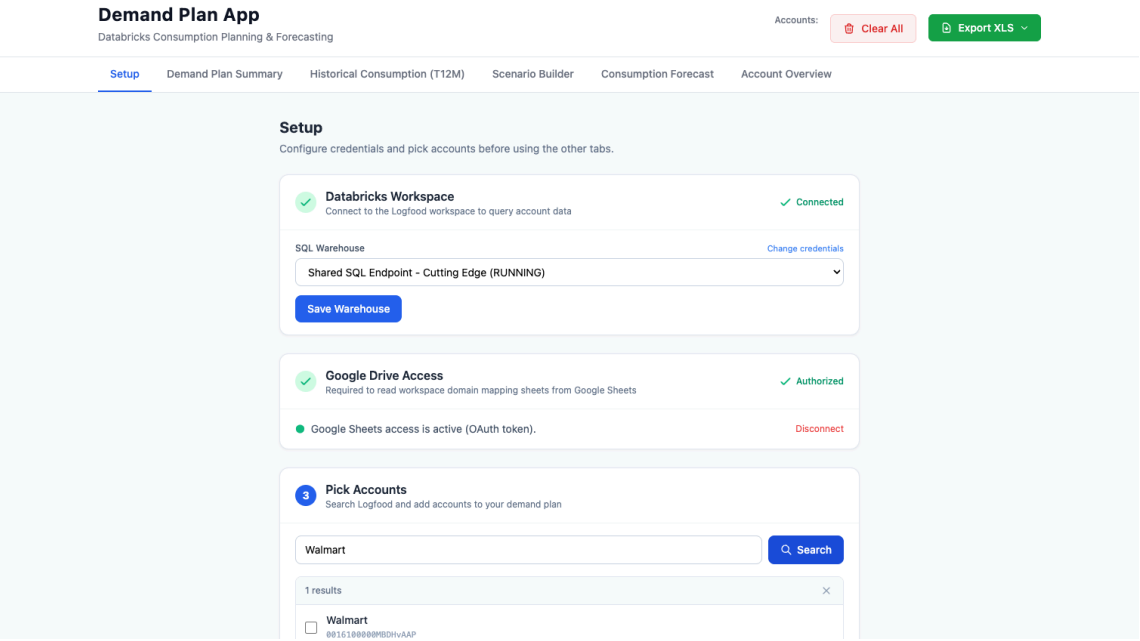
3. Setup — Google Authorized

Google OAuth authorization status displayed.



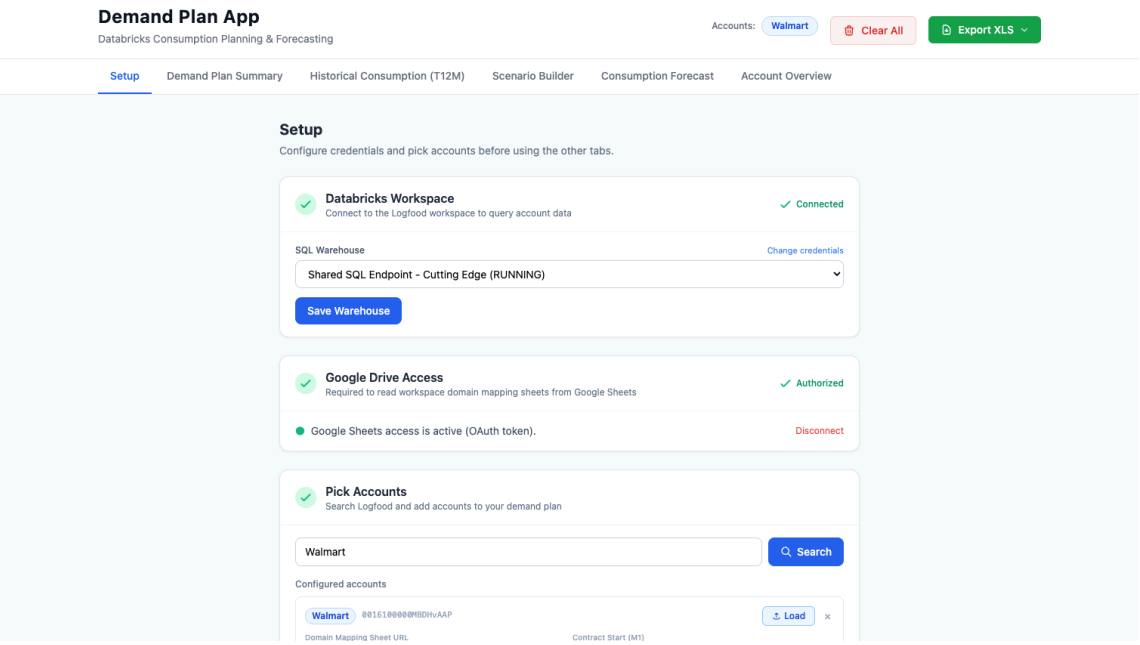
4. Setup — Account Search Results

Searching for "Walmart" returns matching accounts. Results panel is shown with a close (×) button.



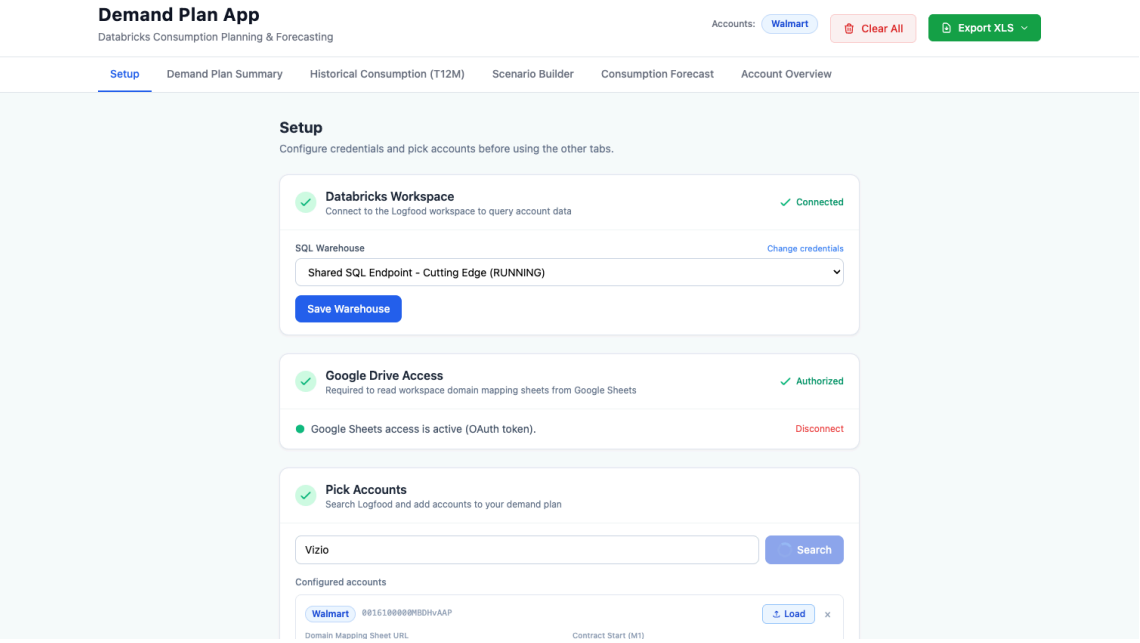
5. Setup — Walmart Account Added

Walmart selected and added to the account list. Search results panel auto-closes after adding.



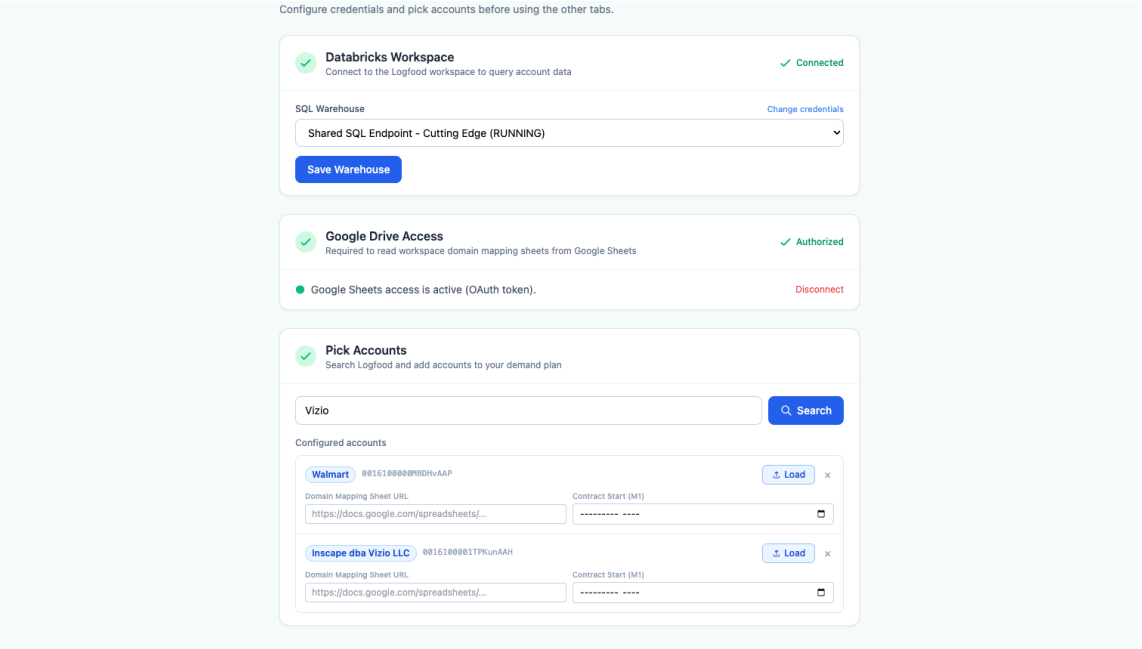
6. Setup — Vizio Search

Searching for "Vizio" to add as the second account.



7. Setup — Vizio Account Added

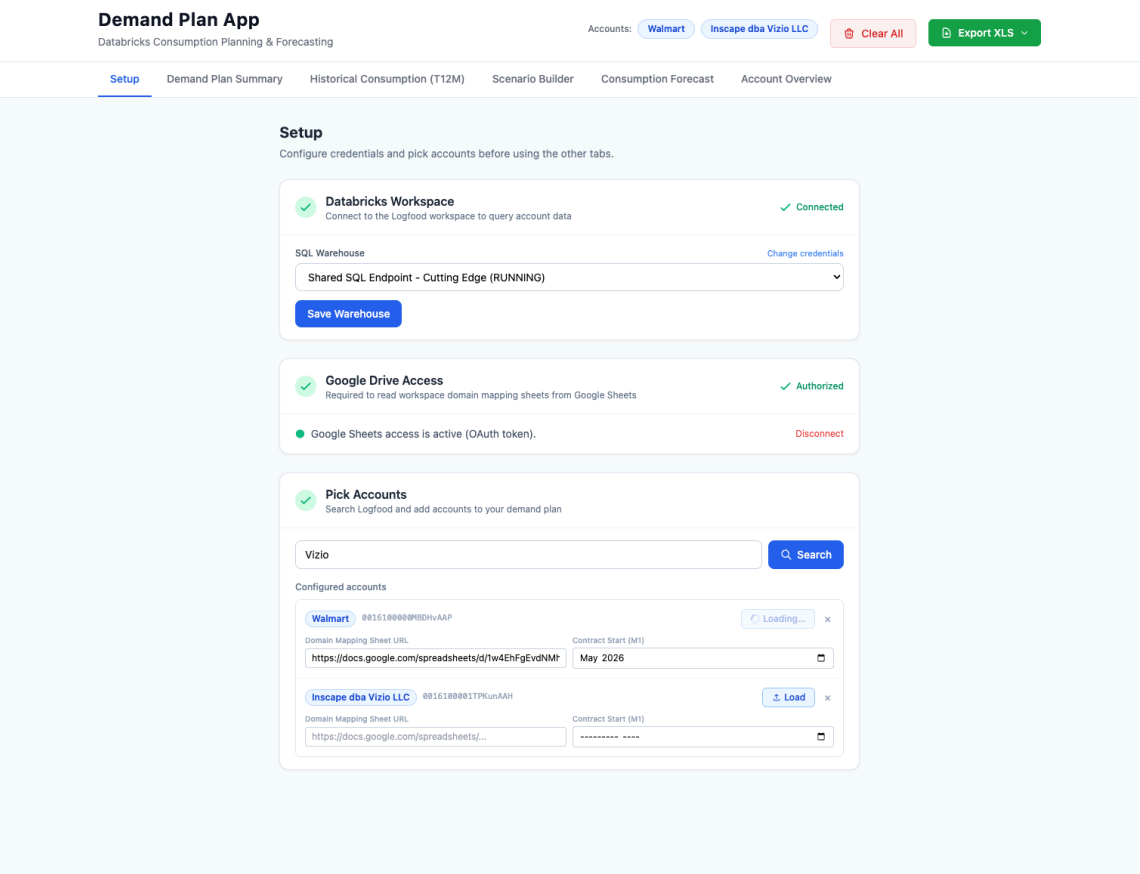
Vizio (Inscape dba Vizio LLC) added successfully. Two accounts now configured.



---

8. Setup — Walmart Data Loaded

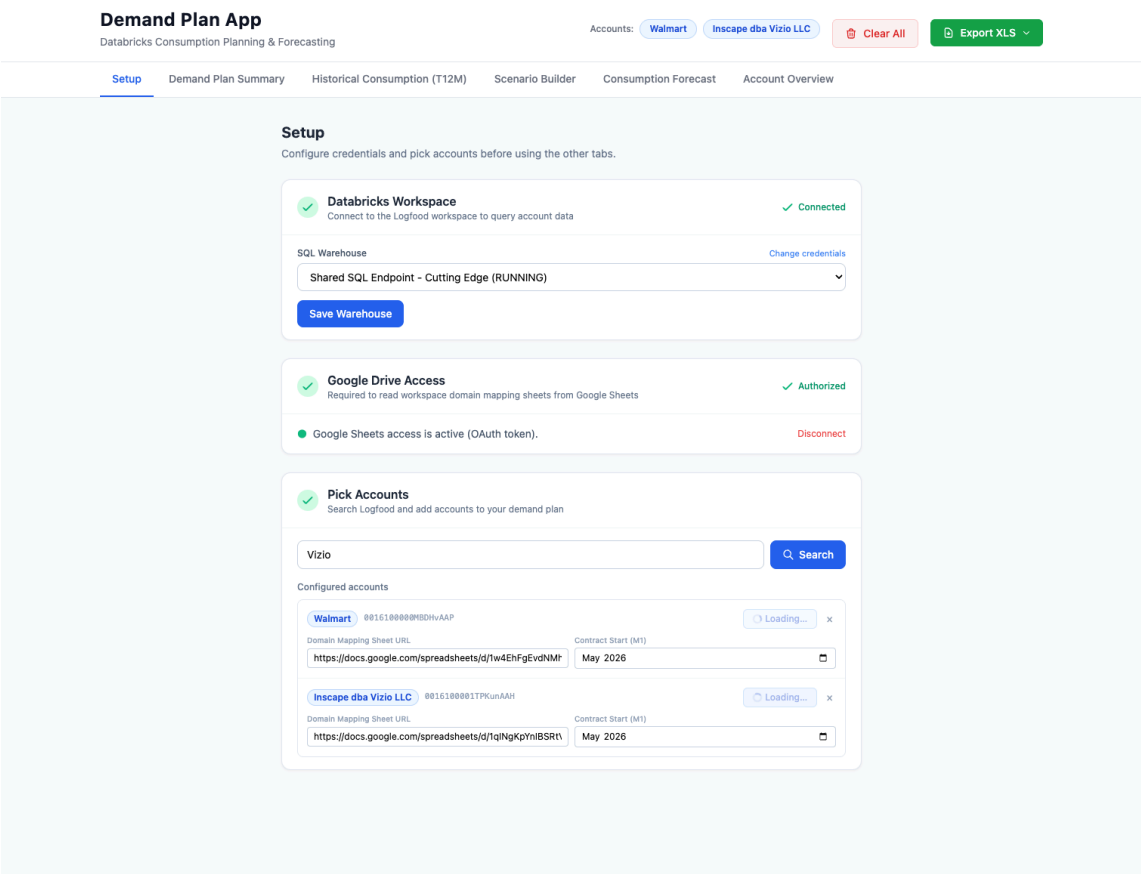
Walmart data loaded via the per-account Load button. Contract start date and use cases visible.



---

9. Setup — Vizio Data Loaded

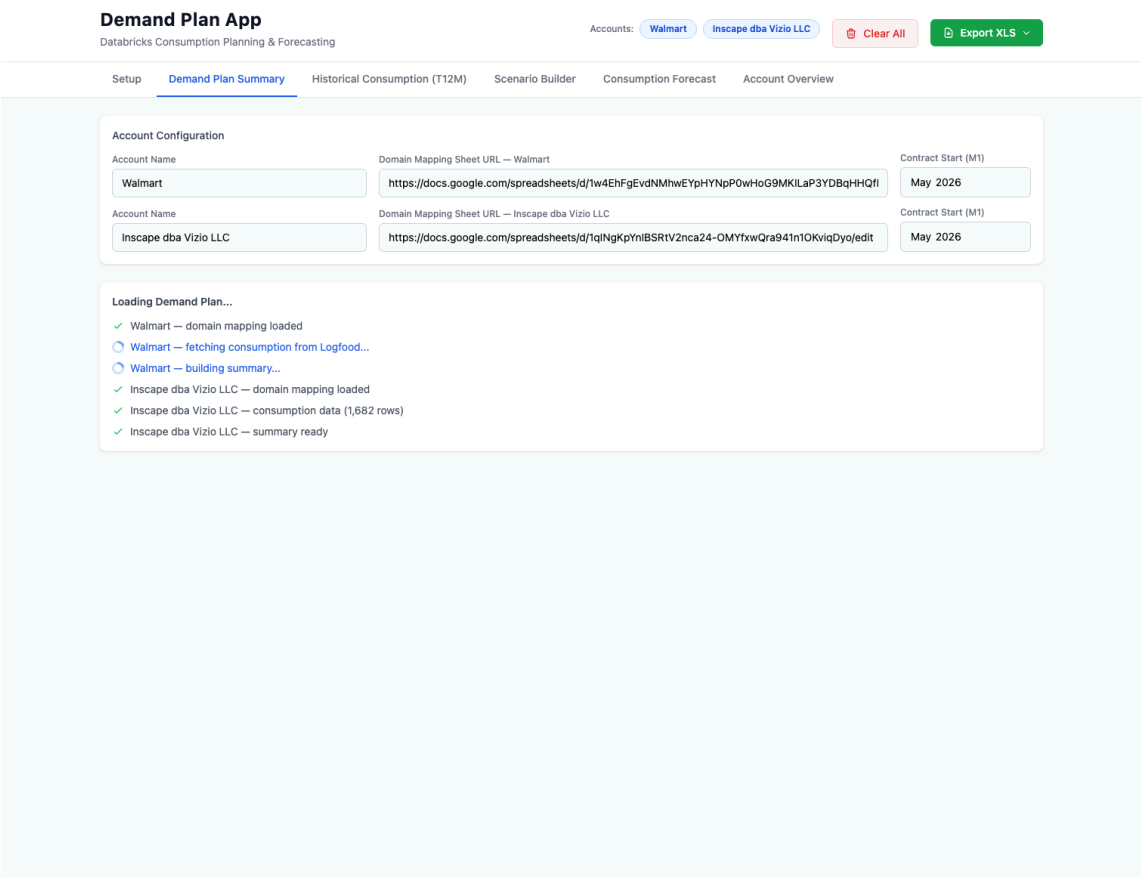
Vizio data loaded. Both accounts ready with historical and scenario data.



---

10. Demand Plan Summary — Overview

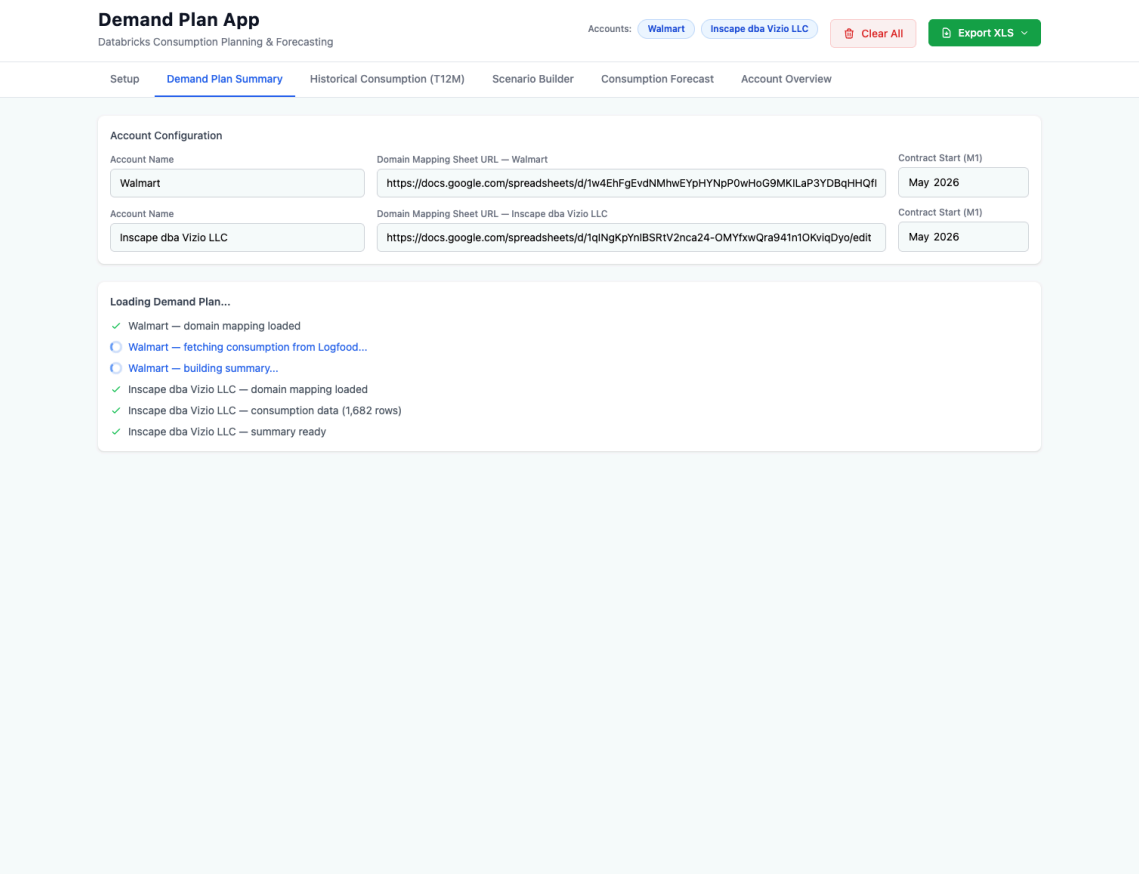
Summary tab shows combined demand plan data for both Walmart and Vizio accounts.



---

11. Demand Plan Summary — Scenarios

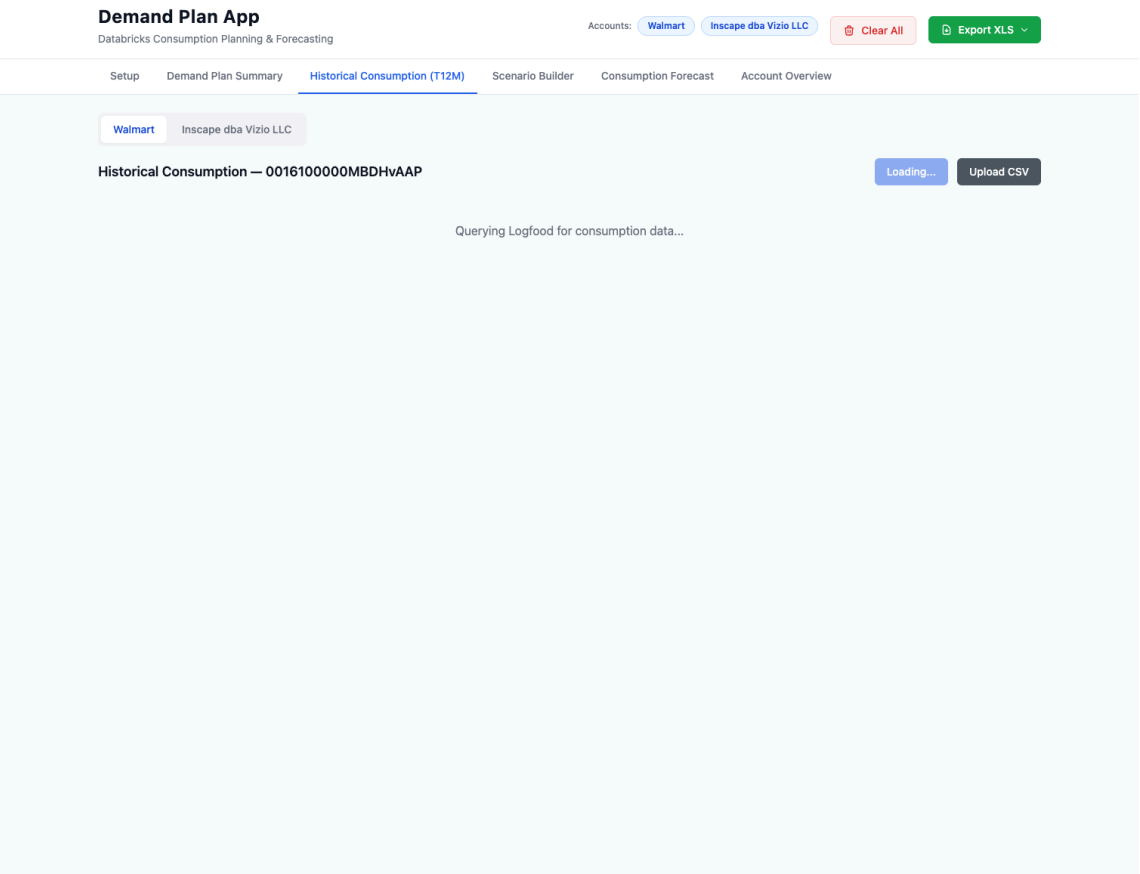
Scenario comparison (S1/S2/S3) visible in the Summary tab.



---

12. Historical Consumption — Overview

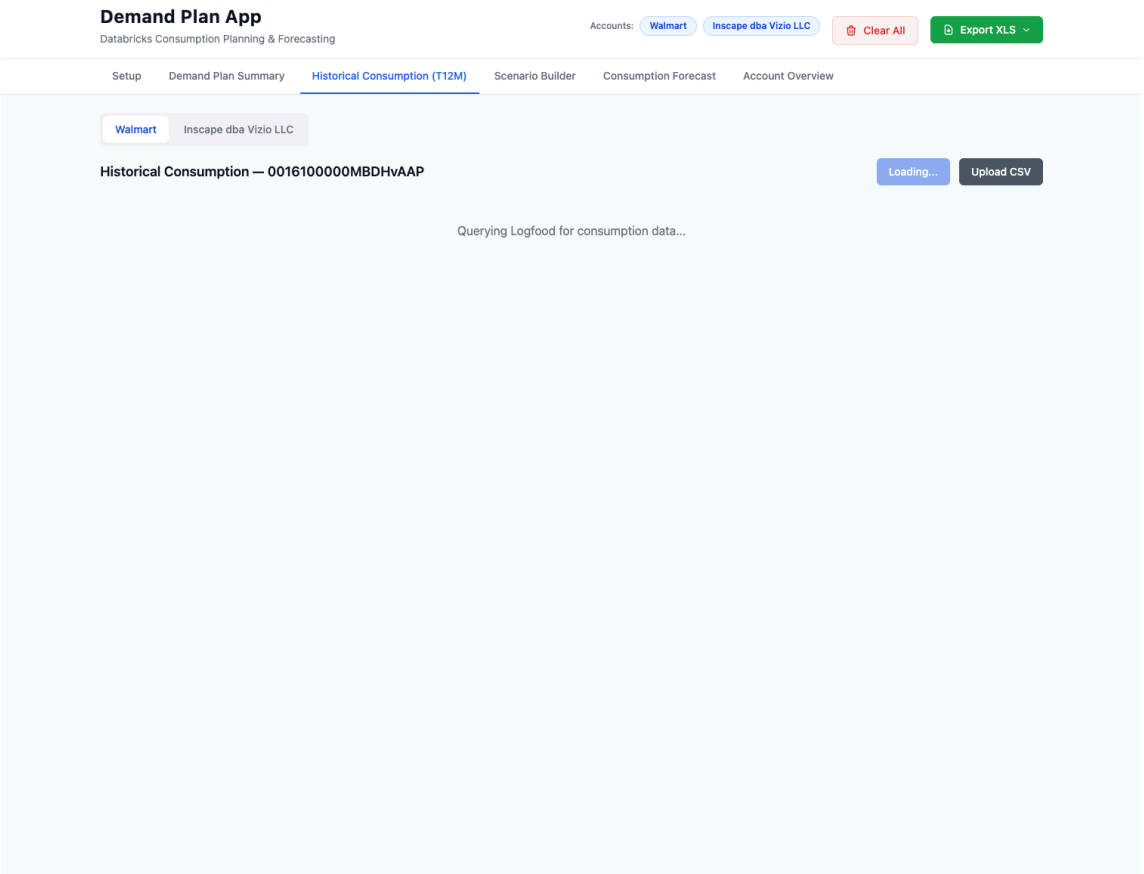
Historical Consumption tab displays usage data overview for the loaded accounts.



---

13. Historical Consumption — Charts

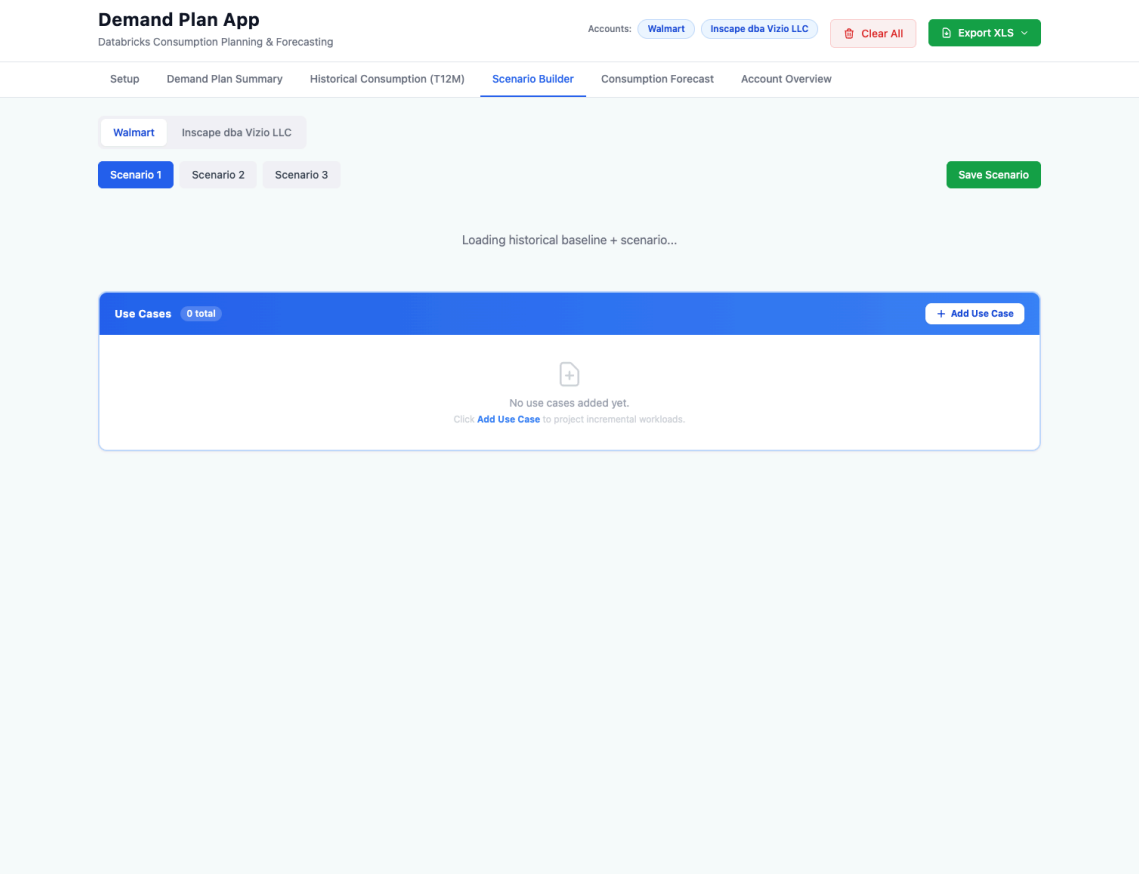
Historical consumption charts rendered with domain and SKU breakdowns.



---

14. Scenario Builder — Main View

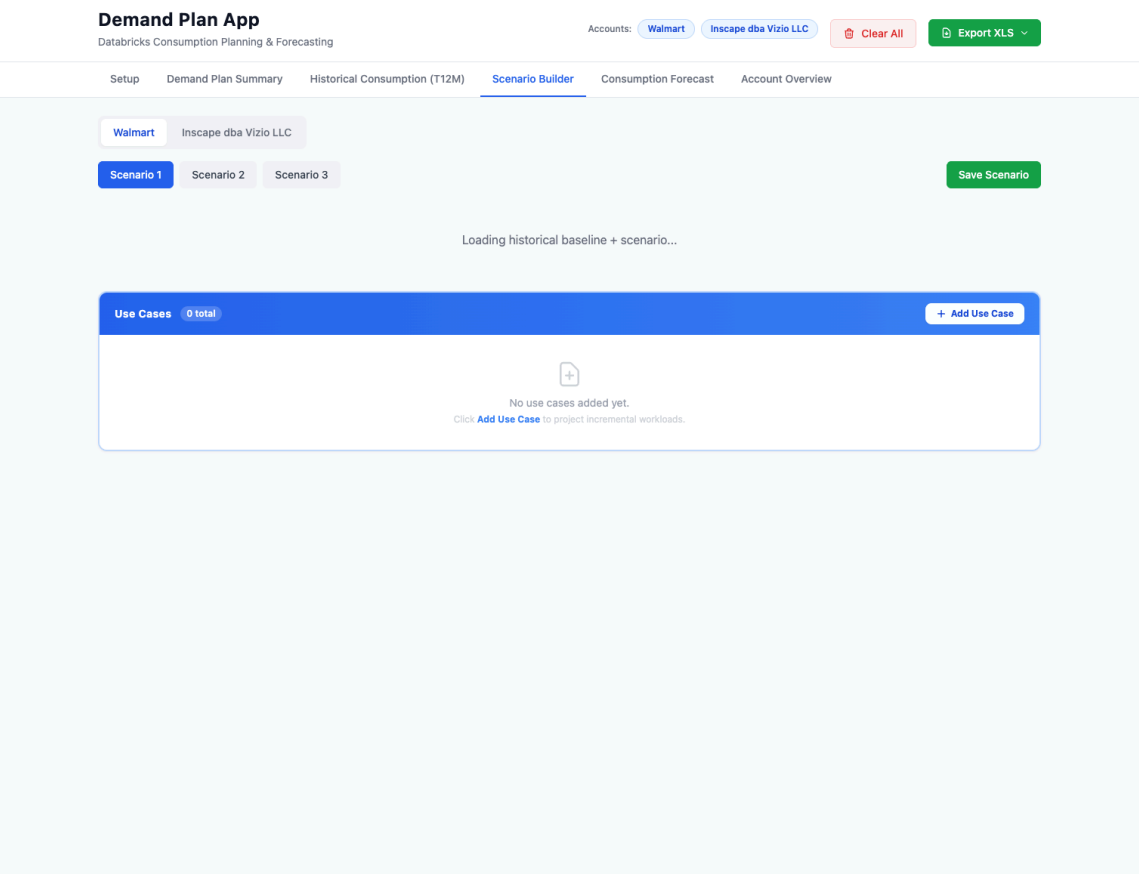
Scenario Builder tab loaded with S1/S2/S3 scenario configuration panels.



---

15. Scenario Builder — Add Use Case

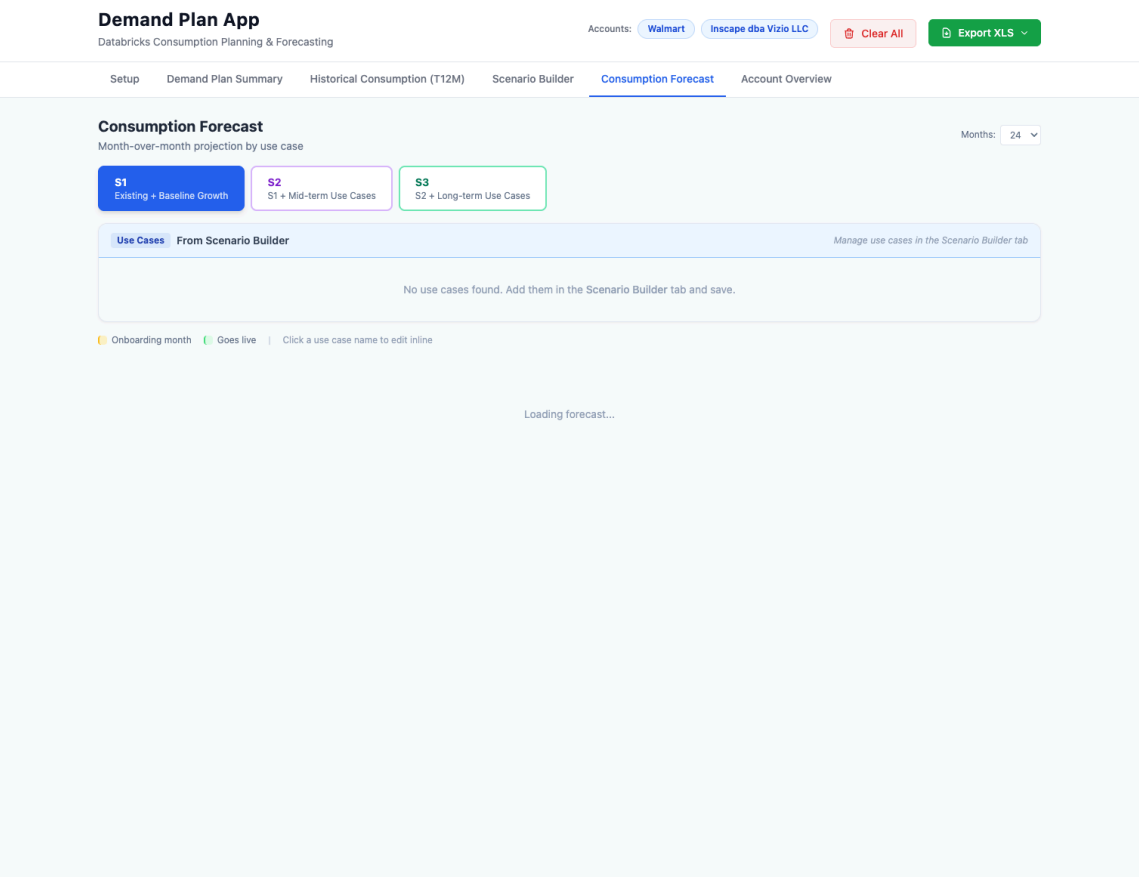
Add Use Case dialog/flow works within the Scenario Builder.



---

16. Consumption Forecast

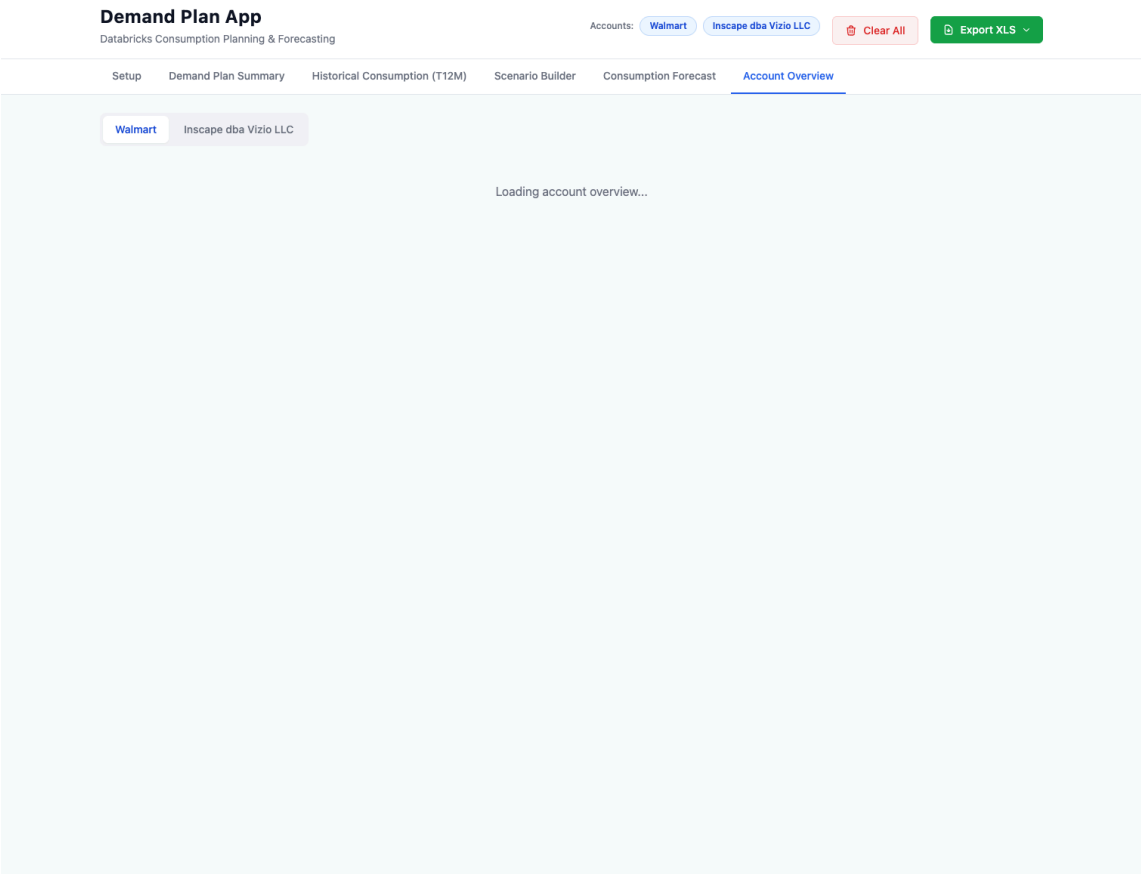
Consumption Forecast tab renders projected usage charts.



---

17. Account Overview

Account Overview tab shows account-level metadata and summary.

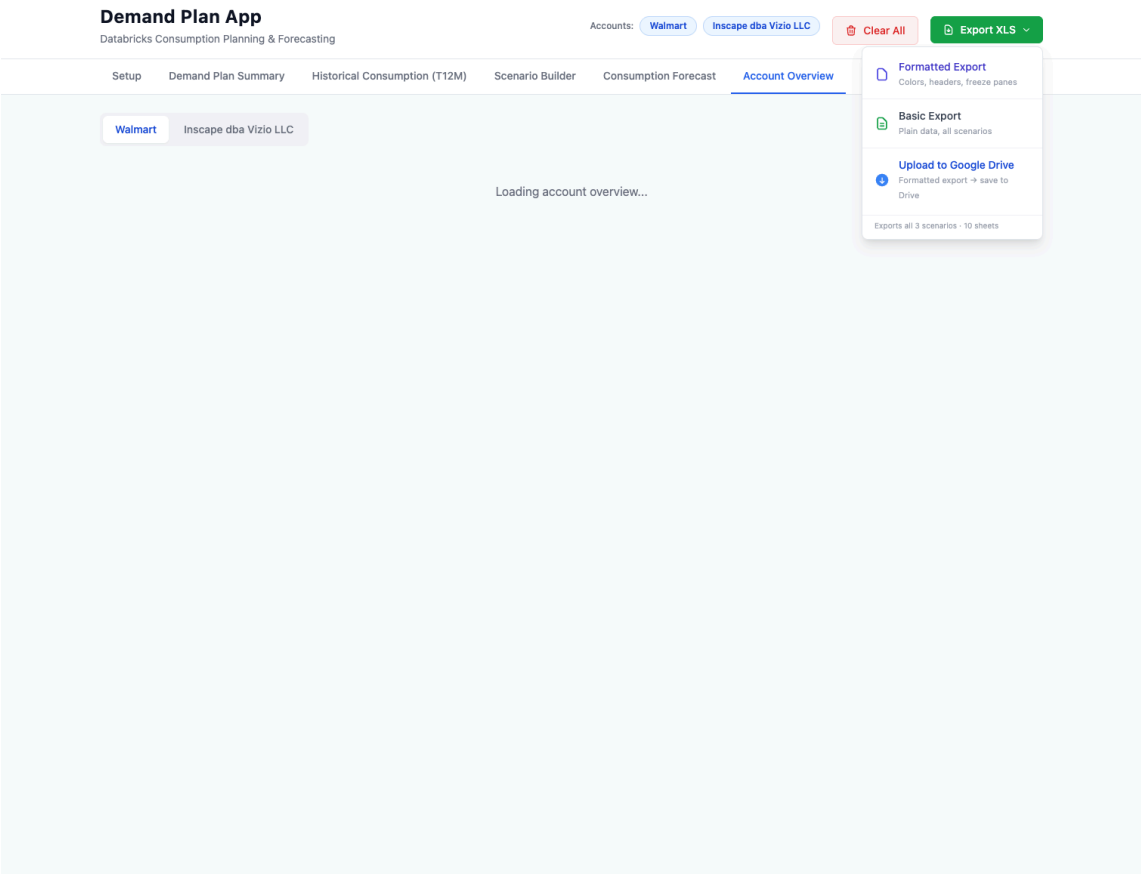


---

18. Export Menu

Export menu opens with all three options:

- **Formatted Export** (ExcelJS)
- **Basic Export** (SheetJS)
- **Upload to Google Drive**

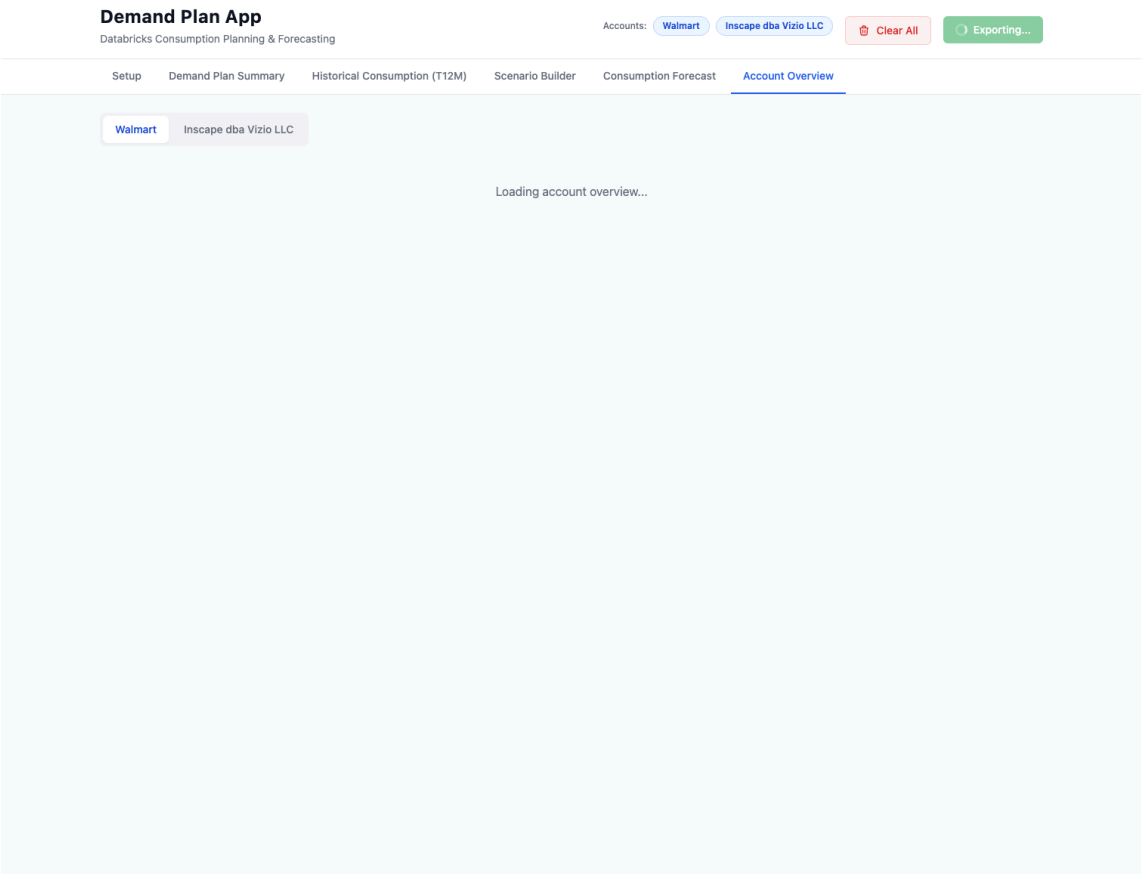


---

19. Formatted Excel Export

Formatted Excel file downloaded successfully. File includes:

- Demand Plan Summary sheet
- S1 / S2 / S3 Projection sheets (all accounts, real calendar month headers)
- Per-account Historical sheets (Hist-Domain, Hist-SKU, Cloud-Domain-SKU)
- Per-account Use Case Details sheets with SKU sub-rows and assumptions

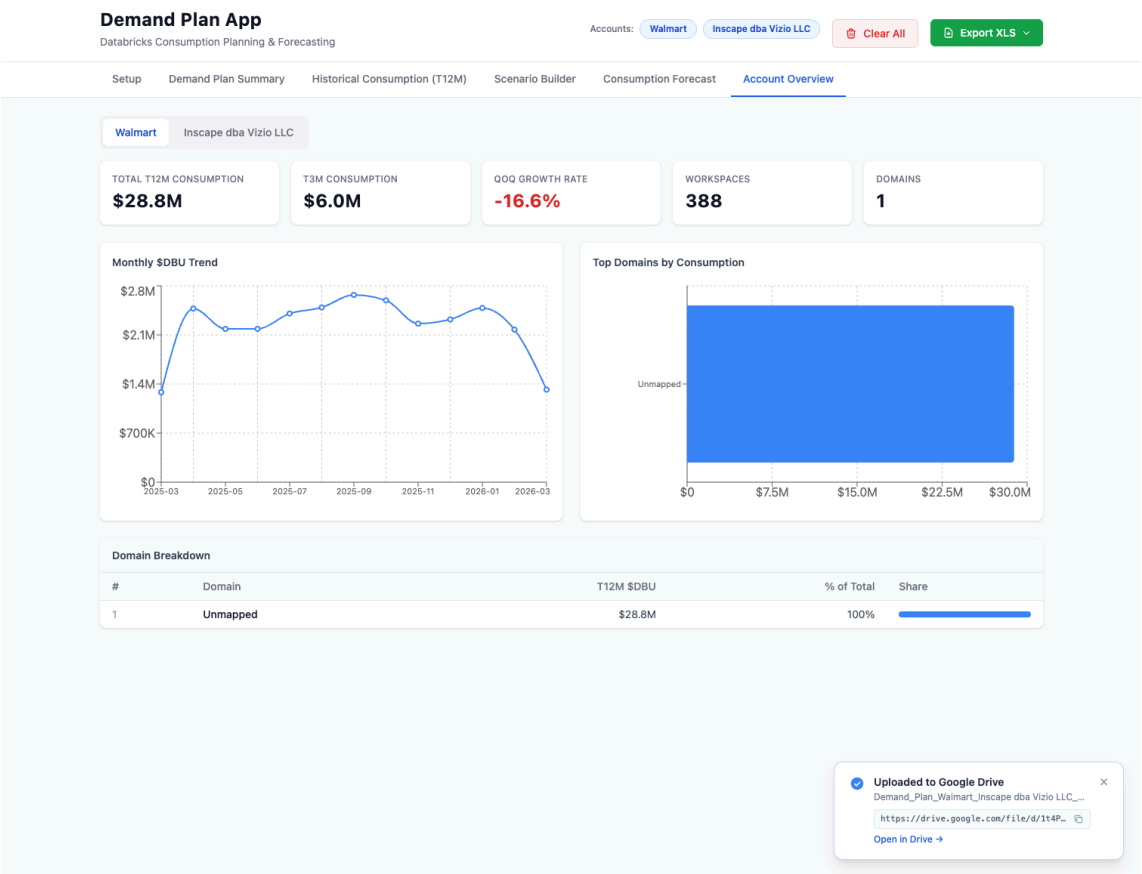


---

20. Upload to Google Drive

Excel file built and uploaded to Google Drive via the backend `/api/export/upload-to-drive` endpoint. Toast notification shows:

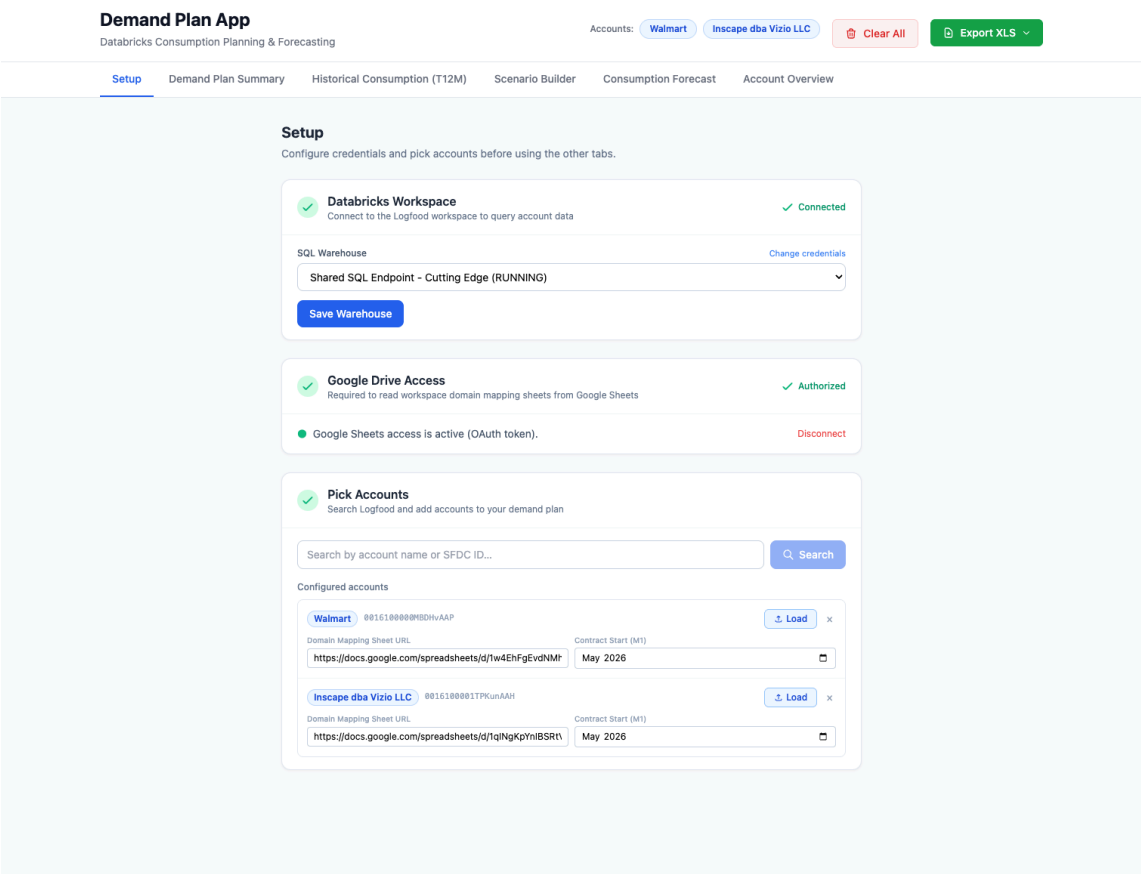
- Upload success confirmation
- Full Google Drive URL in a copyable monospace box
- "Open in Drive →" link for direct access



Round 2 — Use Case Addition Screenshots

21. Initial App State (Round 2 Start)

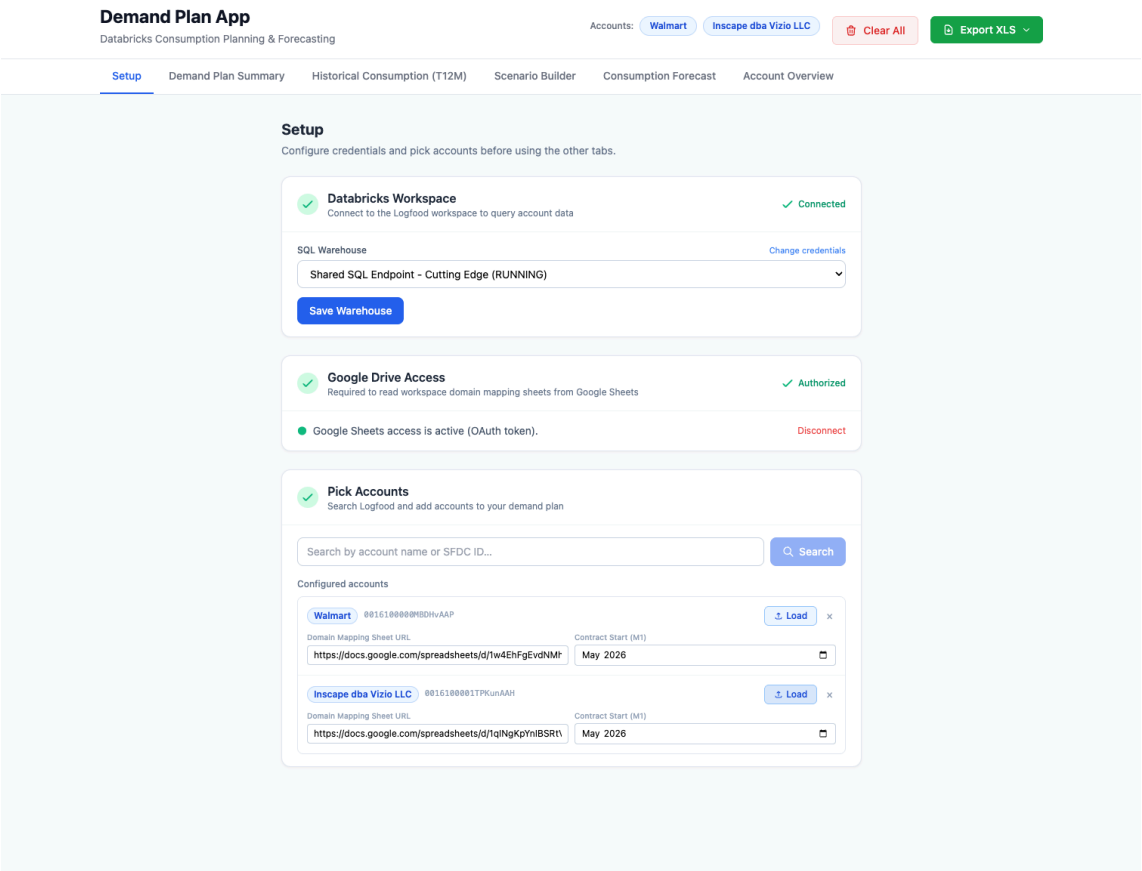
App loaded with both accounts already configured.



---

22. Setup — Both Accounts Loaded

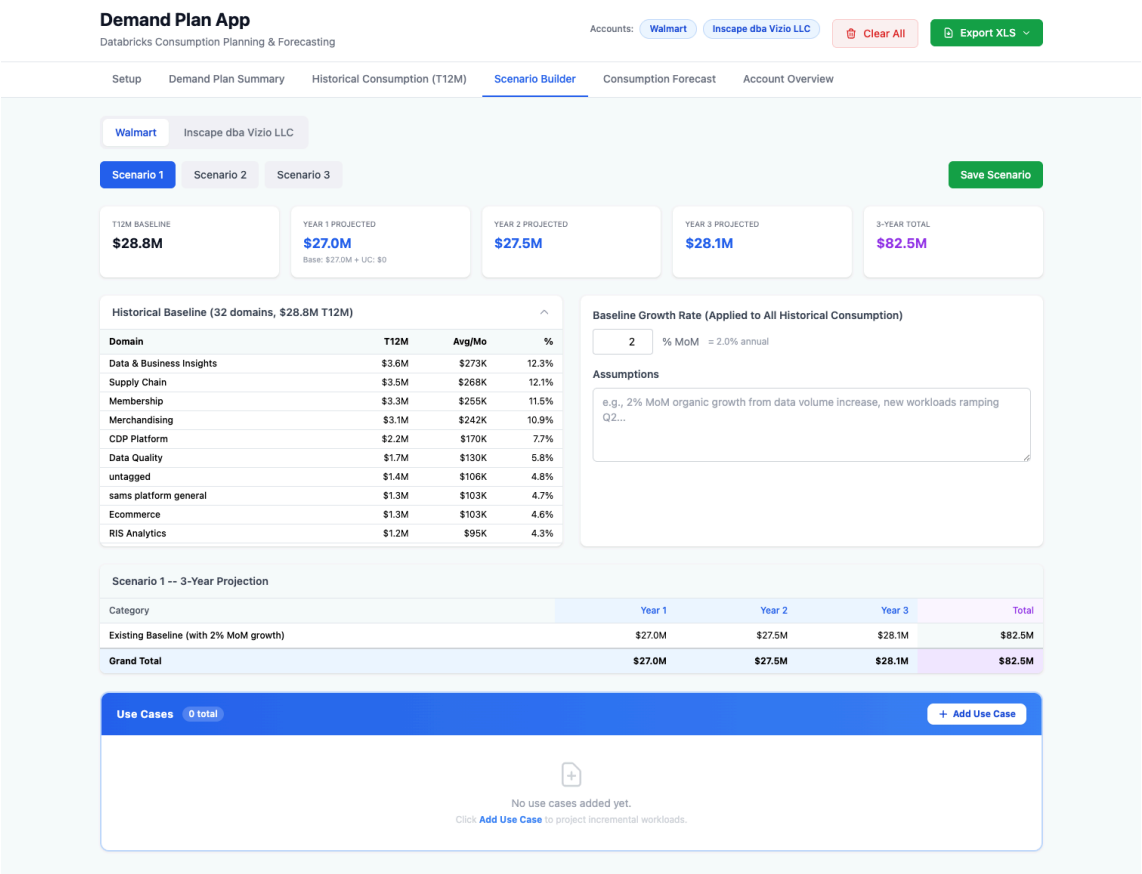
Walmart and Vizio both shown in Setup tab with data loaded.



---

23. Scenario Builder — Initial State

Scenario Builder tab before adding any use cases.



---

24. Walmart — Use Case 1 Added (Cloud Migration)

Cloud Migration added to Walmart Scenario 1:

- Domain: Inscape | Size: M ($15K/mo, $180K/yr) | Ramp: Linear
- Onboarding: M3Y1 (Jul 2026) → Live: M8Y1 (Dec 2026)
- Y1: $113K | Y2: $180K | Y3: $180K | Total: $473K

Merchandising	$3.1M	$242K	10.9%
CDP Platform	$2.2M	$170K	7.7%
Data Quality	$1.7M	$130K	5.8%
untagged	$1.4M	$106K	4.8%
sams platform general	$1.3M	$103K	4.7%
Ecommerce	$1.3M	$103K	4.6%
RIS Analytics	$1.2M	$95K	4.3%

Q2...

Scenario 1 -- 3-Year Projection

Category	Year 1	Year 2	Year 3	Total
Existing Baseline (with 2% MoM growth)	$27.0M	$27.5M	$28.1M	$82.5M
> Delta Sharing	$263K	$420K	$420K	$1.1M
Grand Total	**$27.2M**	**$27.9M**	**$28.5M**	**$83.6M**

Use Cases 1 total S1: 1 S2: 0 S3: 0 + Add Use Case

1 Delta Sharing Data & Business Insights AWS Linear ramp
$35K/mo · Onboard: M3Y1 (Jul'26) → Live: M8Y1 (Dec'26) · Y1: $263K · Y2: $420K · Y3: $420K

e.g., Migrating 50 informatica jobs, expected 10TB daily ingestion...

MONTHLY RAMP PREVIEW

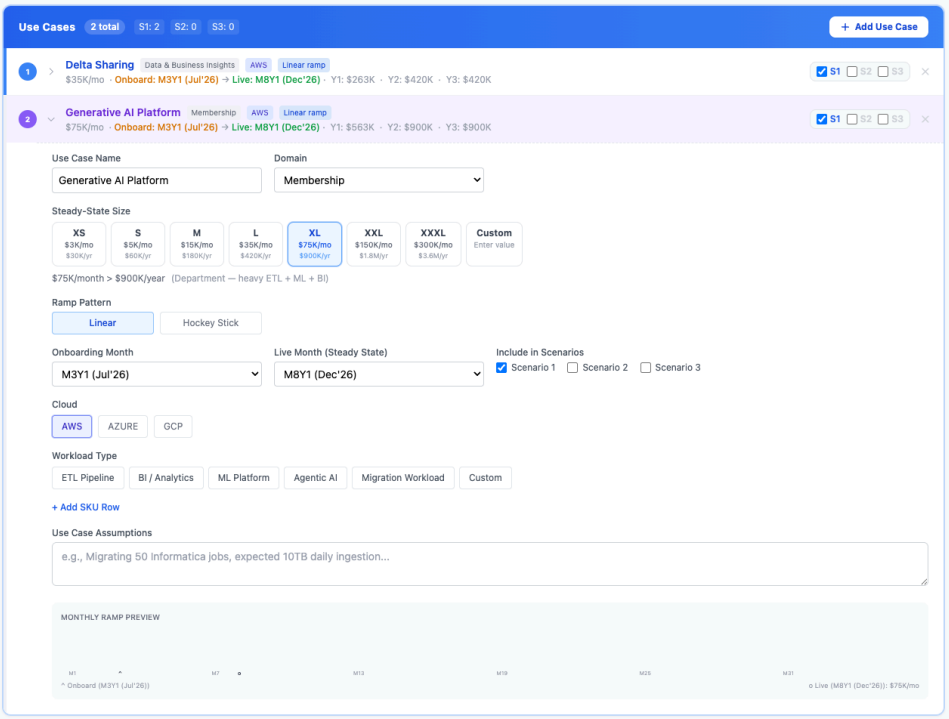
---

25. Walmart — Use Case 2 Added (Data Integration Pipeline)

Data Integration Pipeline added to Walmart Scenario 1:

- Domain: Unmapped | Size: XL ($75K/mo, $900K/yr) | Ramp: Linear
- Onboarding: M2Y1 (Jun 2026) → Live: M7Y1 (Nov 2026)
- Y1: $375K | Y2: $900K | Y3: $900K | Total: $2.175M

Category	Year 1	Year 2	Year 3	Total
Existing Baseline (with 2% MoM growth)	$27.0M	$27.5M	$28.1M	$82.5M
> Delta Sharing	$263K	$420K	$420K	$1.1M
> Generative AI Platform	$563K	$900K	$900K	$2.4M
Grand Total	**$27.8M**	**$28.8M**	**$29.4M**	**$86.0M**

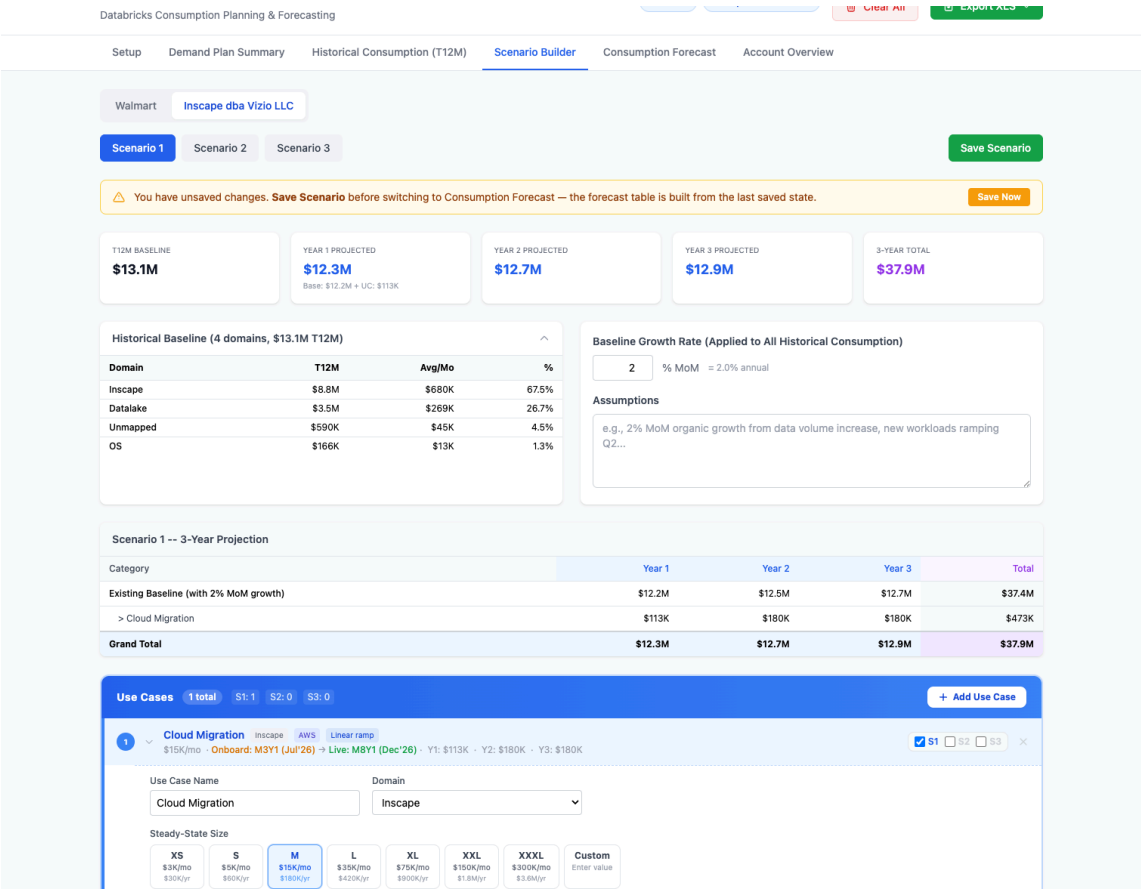


---

26. Vizio — Use Case 1 Added (Cloud Migration)

Cloud Migration added to Vizio Scenario 1:

- Domain: Inscape | Size: M ($15K/mo, $180K/yr) | Ramp: Linear
- Onboarding: M3Y1 → Live: M8Y1
- Y1: $113K | Y2: $180K | Y3: $180K | Total: $473K

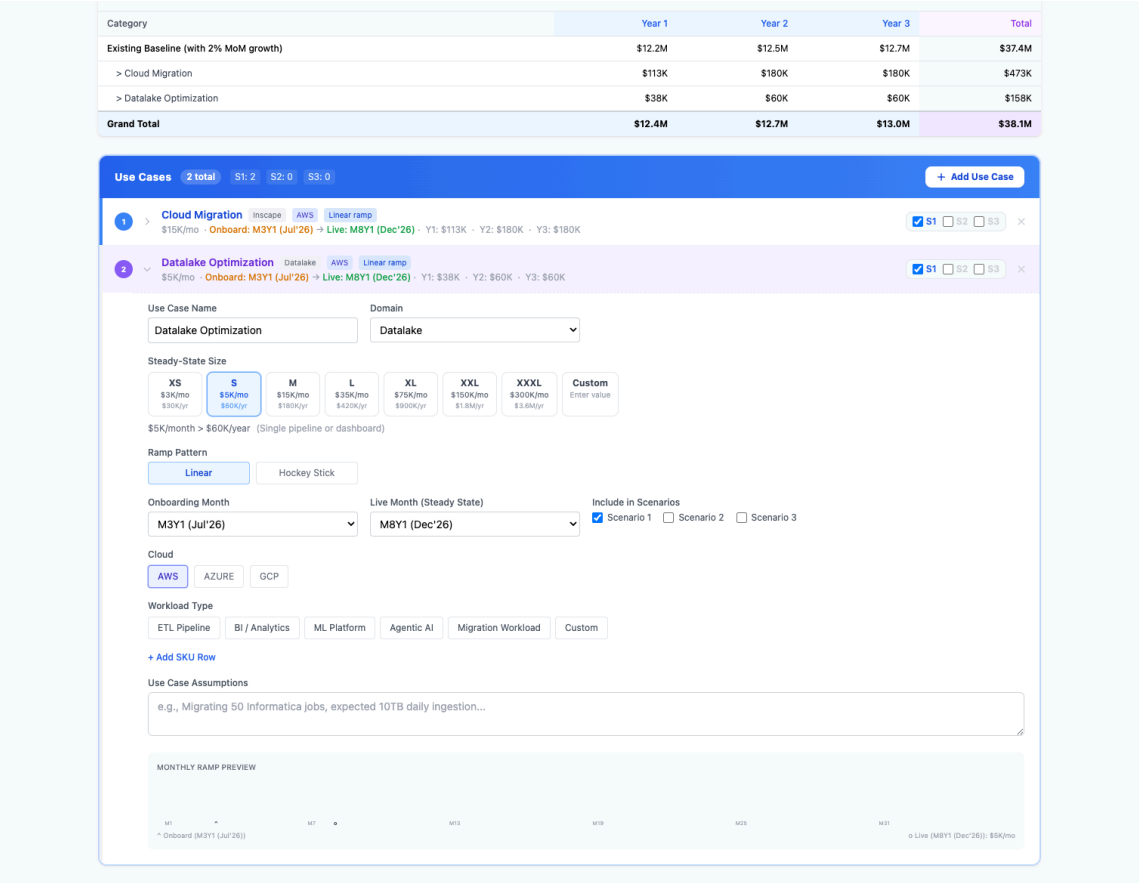


---

27. Vizio — Use Case 2 Added (Datalake Optimization)

Datalake Optimization added to Vizio Scenario 1:

- Domain: Datalake | Size: S ($5K/mo, $60K/yr) | Ramp: Linear
- Onboarding: M3Y1 → Live: M8Y1
- Y1: $38K | Y2: $60K | Y3: $60K | Total: $158K

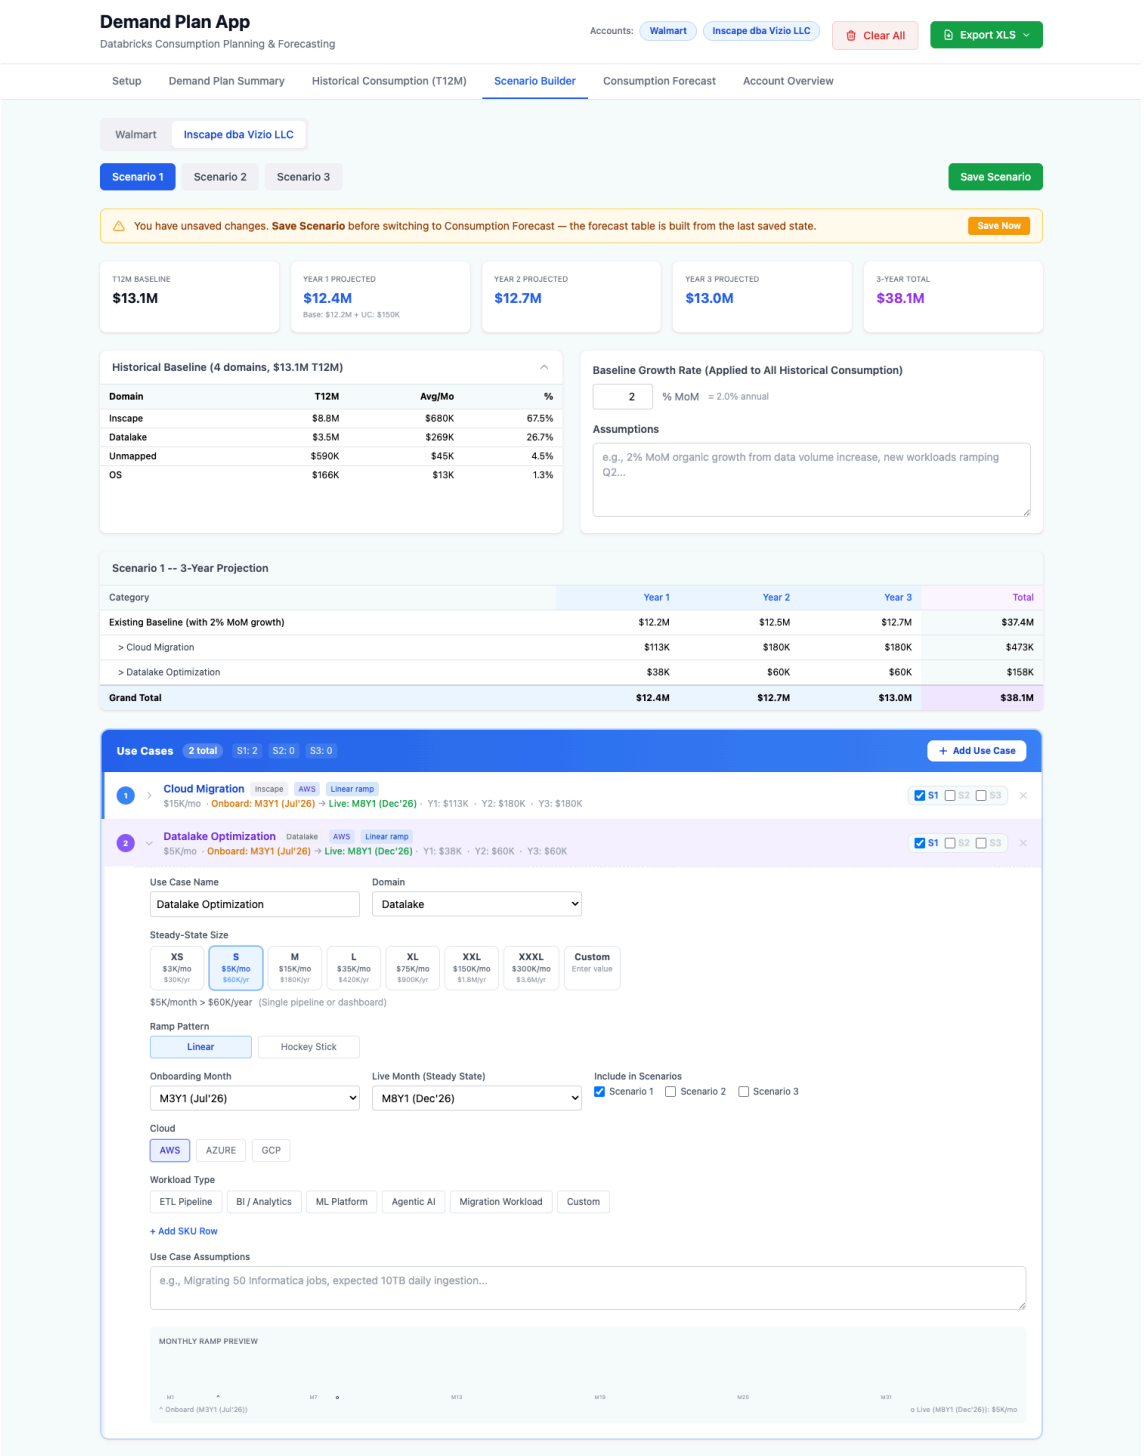


Category	Year 1	Year 2	Year 3	Total
Existing Baseline (with 2% MoM growth)	$12.2M	$12.5M	$12.7M	$37.4M
> Cloud Migration	$113K	$180K	$180K	$473K
> Datalake Optimization	$38K	$60K	$60K	$158K
Grand Total	**$12.4M**	**$12.7M**	**$13.0M**	**$38.1M**

---

28. All Use Cases Added (4 Total)

Scenario Builder showing all 4 use cases — 2 per account.



29. Demand Plan Summary — With Use Cases

Summary tab updated with projections including the new use cases.

Account	Year 1	Year 2	Year 3	Total
Walmart	$26.9M	$27.5M	$28.0M	$82.4M

Vizio	$12.4M	$12.7M	$13.0M	$38.1M
Combined	**$39.3M**	**$40.2M**	**$41.0M**	**$120.5M**

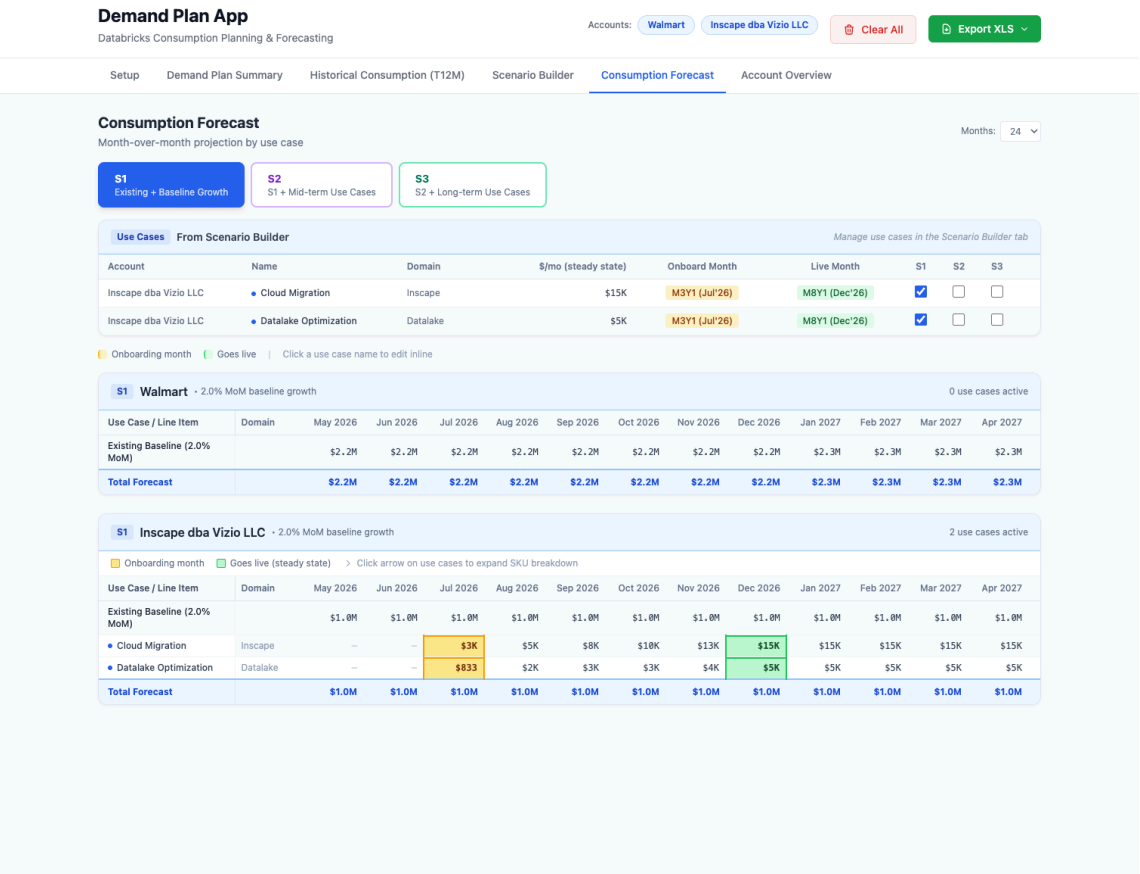
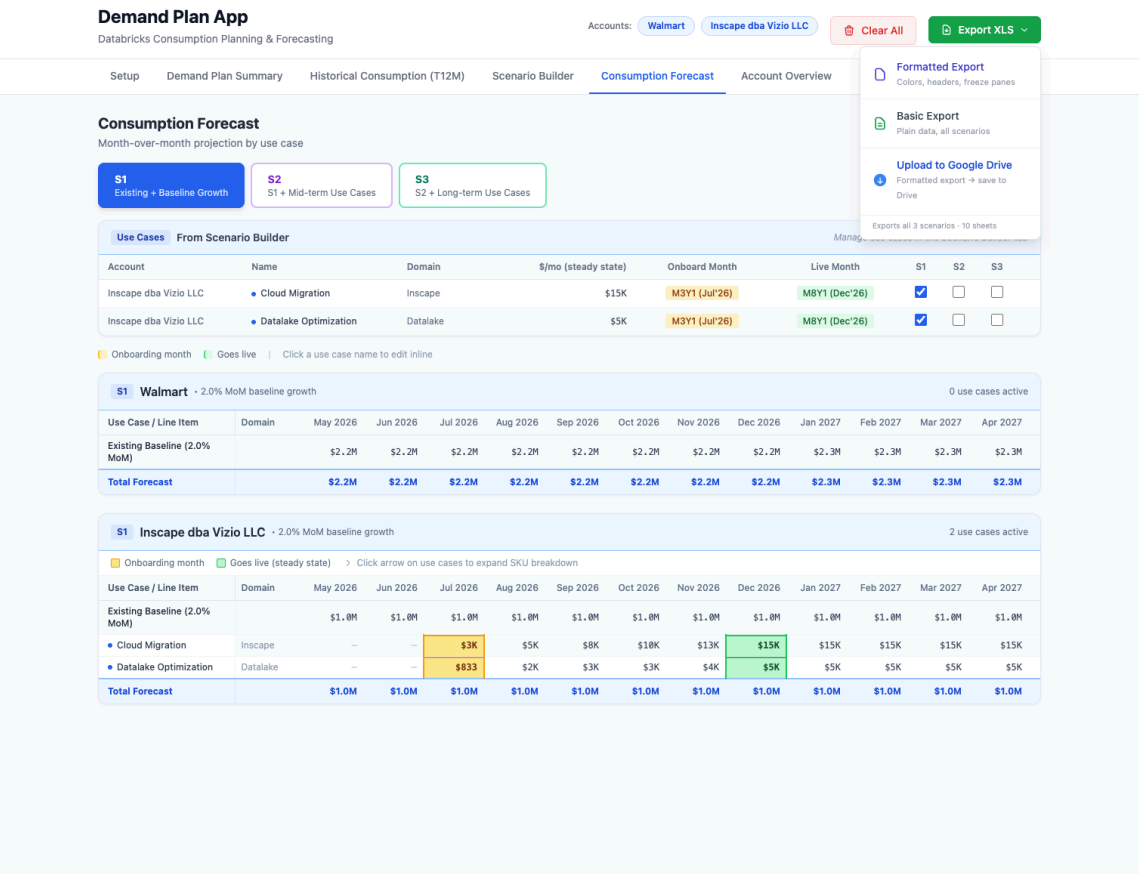
30. Consumption Forecast — With Use Cases

Monthly forecast updated to reflect added use cases.



31. Export Menu (Round 2)

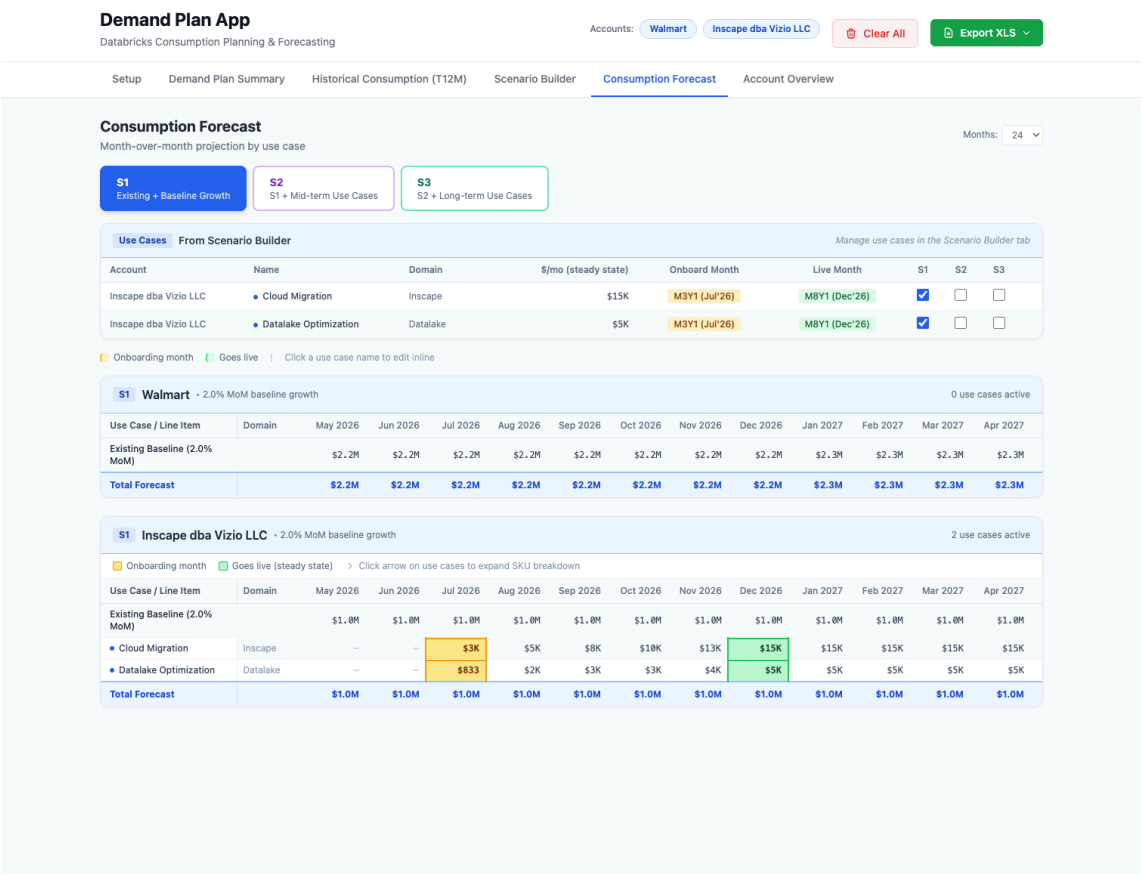
All 3 export options remain accessible after adding use cases.



---

32. Formatted Export — With Use Cases

Excel file downloaded including all 4 use cases (2 per account) in projection and detail sheets.

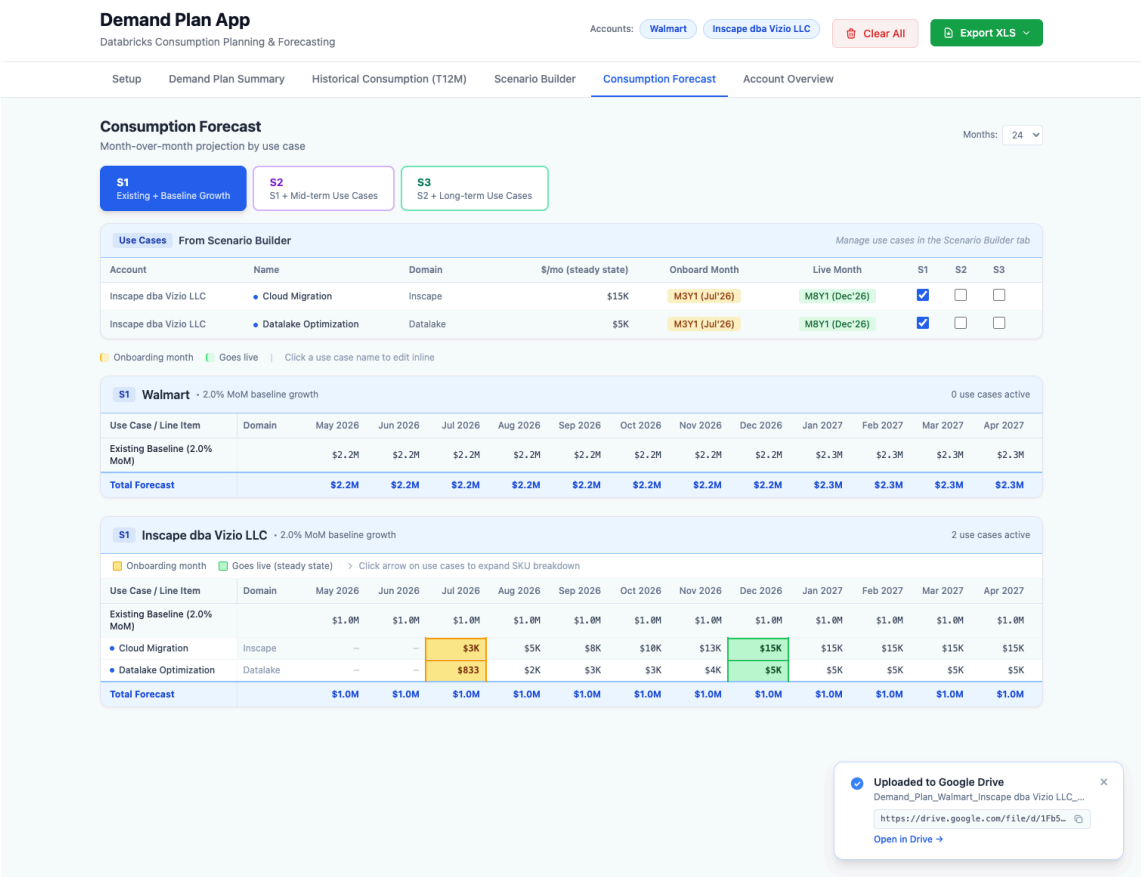


---

33. Google Drive Upload — Success Toast

Excel file with use cases uploaded to Drive. Drive URL shown in copyable toast.

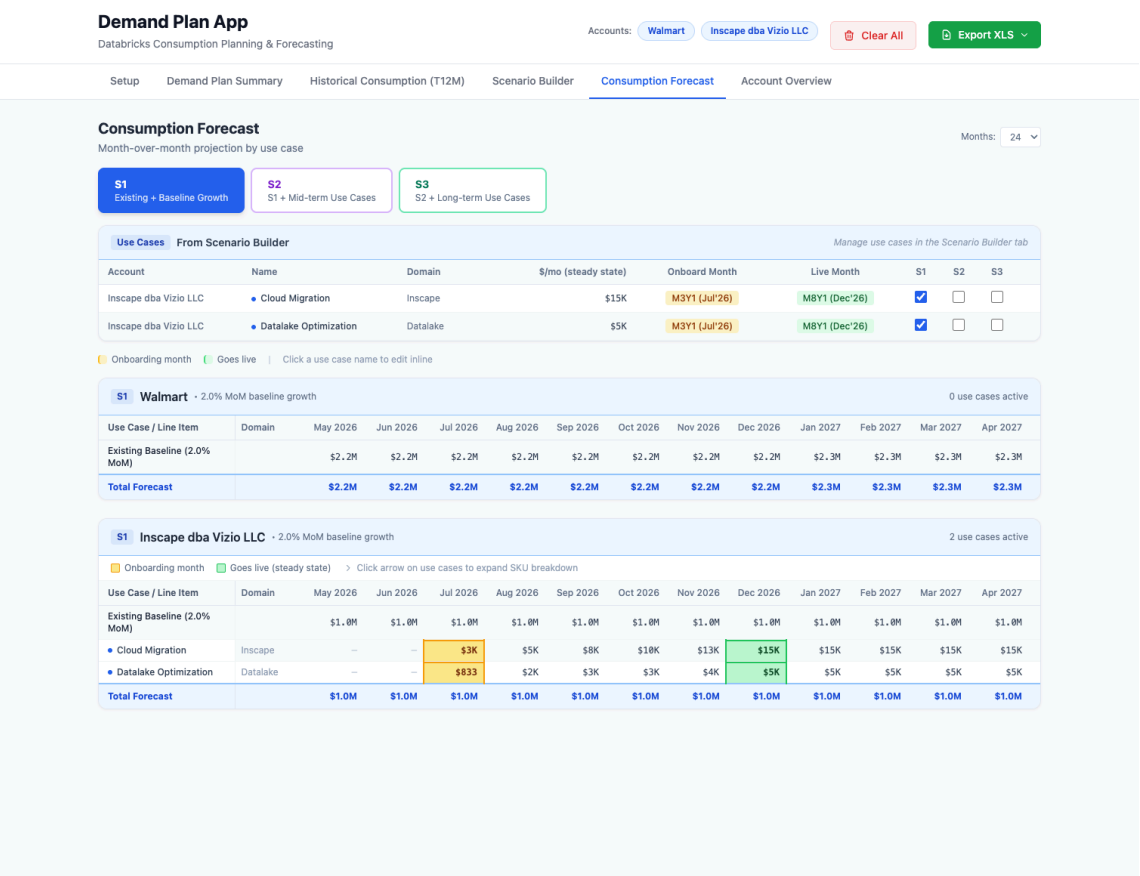
- **File:** `Demand_Plan_Walmart_Inscape dba Vizio LLC_AllScenarios_2026-03-19.xlsx`
- **Drive URL:** https://drive.google.com/file/d/1Fb5DooKeUf7Bc7eI76nULSoOPuxjA962/view



---

34. Final App State

App remains stable and responsive after all operations.



Export Sheet Structure (Verified)

Order	Sheet Name	Description
1	Demand Plan Summary	Combined summary for all accounts
2	S1 - Projection	Scenario 1: all accounts, real month headers, SKU rows
3	S2 - Projection	Scenario 2: same structure
4	S3 - Projection	Scenario 3: same structure
5	`<Account> Hist-Domain`	Per-account historical by domain
6	`<Account> Hist-SKU`	Per-account historical by SKU
7	`<Account> Cloud-Domain-SKU`	Per-account cloud/domain/SKU breakdown
8	`<Account> Use Cases`	Use case details with SKU sub-rows
9	`<Account> Baseline`	Baseline consumption data

10	`<Account> SKU Detail`	SKU-level detail sheet
(repeats 5–10 for each additional account)		

Key Features Verified

- **Default Setup Tab**: App opens on Setup tab, not Summary
- **Account Search Close Button**: × button in search results panel, auto-closes after adding
- **Real Calendar Month Headers**: `May_2026`, `Jun_2026` format replaces `M1`, `M2` placeholders
- **Multi-Account Projection Sheets**: All accounts appear as sections within S1/S2/S3 sheets
- **SKU Breakdown Rows**: `└ SKU Name (N%)` sub-rows under each use case in projection sheets
- **Per-Account Historical Sheets**: Named `Walmart Hist-Domain`, `Vizio Hist-Domain`, etc.
- **Vizio Data in Summary**: Fixed — lookup uses `sfdc_id` not display name
- **Google Drive Upload**: Backend multipart upload with Drive URL returned and displayed in toast
